An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Jianming Hao on 7/11/06.

#### EXAMINER'S AMENDMENT

Insert --This application claims the benefit of US provisional application 60/145,801, filed July, 27,1999.-- as the first line of the specification

In Claim 23, line 1, delete --a-- prior to --lycopene--.

In Claim 23, line 5, insert --in said host cell-- following --phytoene desaturase--.

Cancel Claims 22, 38, 49, 52-54, 58-60, and 63-74.

The following is an examiner's statement of reasons for allowance: All claims are now limited to *E. coli* cells lacking a functional glnL gene and transformed with a gene encoding a isopentenyl diphosphate isomerase, a geranylgeranyl diphosphate synthase, a 1-deoxyxylulose 5-phosphate synthase, a phytoene synthase, or a phytoene desaturase operably linked to a promoter

which is regulated by acetyl phosphate or methods of use thereof for producing a carotenoid. One of skill in the art would not have been motivated to link the production of these carotenoid biosynthetic genes to the production of acetate because acetate was known to be detrimental to the growth of cells. While the skilled artisan would have expected that the expression of a carotenoid biosynthetic gene would reduce the acetate production as the action of carotenoid biosynthetic gene would increase the flow of carbon into the carotenoid biosynthetic pathway and thus away from acetate production, one of skill in the art would not have necessarily expected that this would be sufficient to alleviate the detrimental effects of acetate and that one could achieve sufficient levels of production of carotenoids under these conditions. As such a skilled artisan would not have been motivated to select an acetyl phosphate regulated promoter for the expression of these genes.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
